

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Course Code & Name : CGI1354 - BUILDING RAG BASED SOLUTIONS
Year / Semester : III / VI
Section : A
Title of the Project : SCHOLAR AI - AN INTELLIGENT RESEARCH
ASSISTANT PLATFORM

S. No.	Students Name	Register Number
1.	GODFREY T R	2303811710421047
2.	GRISH NARAYANAN S	2303811710421048
3.	HARI PRAKASH A	2303811710421049

ABSTRACT

ScholarAI is an AI-powered academic research assistant designed to simplify the process of analyzing and managing research papers. It uses advanced technologies like Retrieval-Augmented Generation (RAG) and Natural Language Processing (NLP) to provide features such as document summarization, semantic search, and conversational interaction. The platform enables users to upload papers, extract key insights, compare documents, and interact with content intelligently. Overall, ScholarAI improves research efficiency, reduces manual effort, and offers a unified solution for modern academic workflows..

Keywords: Artificial Intelligence (AI), Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Semantic Search, Document Analysis, Machine Learning (ML), Conversational AI.
